

Can you obtain the data that are needed from my information systems?

Dr. Dexter has a well-established business process for the efficient retrieval of information from hospital OR information systems, anesthesia information management systems, and/or anesthesia group billing information systems. Dr. Dexter's team is familiar with most commercially available systems. They have considerable experience in extracting and cleaning data. [Click here](#) for our systematic analysis of data quality. [Click here](#) for the accompanying editorial about our role in the establishment of the field and experience in quality use of such data.
